

Volvic Natural Spring Water – Annual Water Quality Report

At Volvic we are proud of the quality of our products. Volvic Natural Spring Water is distributed nationally and meets or exceeds all bottled water standards for quality and safety at the Federal and state level. The US Food and Drug Administration (FDA) regulates bottled water as a food. Our scientists and independent certified laboratories perform extensive tests on the water source and finished bottled water product to ensure we exceed or are compliant with all Federal and state bottled water requirements.

In addition to existing stringent regulatory standards, the International Bottled Water Association (IBWA) maintains a strict Model Code of quality for its members. Volvic is a member of IBWA and meets or exceeds the quality requirements of the IBWA's Model Code. Additionally, we take pride in the fact that our bottled water production plant is annually inspected, on an unannounced basis, by an independent testing organization, NSF International (NSF). Based on unannounced annual plant inspections and product testing, NSF certifies that Volvic Natural Spring Water complies with federal and state bottled water regulations and IBWA's Model Code. NSF is located in Ann Arbor, Michigan. For more information about IBWA and NSF, please visit their websites at <http://www.bottledwater.org> and <http://www.nsf.org> or call IBWA at 1-800-WATER-11 and NSF at 1-800-673-6275.

Volvic Natural Spring Water Source

Volvic Natural Spring Water is from a 1,520 square mile nature preserve in Auvergne, France. Volvic Natural Spring Water is naturally filtered as it slowly trickles down through hundreds of layers of porous puzzolana sand, basalt, and lava stone. As the water filters through these different volcanic layers, it absorbs natural minerals.

Volvic Natural Spring Water Bottling

Volvic Natural Spring Water is bottled exclusively at its protected source. – the Clairvic Spring. Volvic's source is approved by several regulatory agencies based on a detailed and extensive review. To ensure the purity and consistency of Volvic, automated bottling equipment is maintained under strict sanitary conditions and a quality control laboratory conducts several hundred quality tests daily, both at the water source and finished bottled water product.

Volvic Natural Spring Water Additional Safety Measures

Volvic Natural Spring Water is treated with Greensand Filtration – the use of manganese coated filters to reduce naturally present minerals from source water.

Water Quality Data

Attached is a copy of our most recent extensive water quality testing conducted by the independent certified laboratory, NSF. The NSF Report lists the water quality test results for over 175 substances including inorganics (metals, minerals, etc.), organics (pesticides, herbicides, etc.) and microbials as well as physical parameters. Volvic Natural Spring Water is analyzed for both regulated and unregulated substances. This Report contains the substance analyzed, approved test method used, test result, minimum detection limit, measurement unit, date analyzed and FDA Quality Standard for bottled water, if applicable. The FDA Quality Standards are the maximum allowable levels for over 80 substances in bottled water.

Volvic Natural Spring Water is in full compliance with all federal, state and industry bottled water standards.

For more information about Volvic Natural Spring Water, call 1-800-233-6200 or write to us at Volvic Consumer Care, PO Box 1625, Horsham, PA 19044

Terms:

“statement of quality” – The standard (statement) of quality for bottled water is the highest level of a contaminant that is allowed in a container of bottled water, as established by the United States Food and Drug Administration (FDA) and the California Department of Public Health. The standards can be no less protective of public health than the standards for public drinking water, established by the U.S. Environmental Protection Agency (EPA) or the California Department of Public Health.

“maximum contaminant level (MCL)” – The highest level of a contaminant that is allowed in drinking water, established by the U.S. Environmental Protection Agency (EPA) or the California Department of Public Health. Primary MCLs are set as close to the PHGs as is economically and technologically feasible.

“public health goal (PHG)” – The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.

“primary drinking water standard” – MCLs for contaminants established by the U.S. Environmental Protection Agency (EPA) or the California Department of Public Health that affect health along with their monitoring and reporting requirements, and water treatment requirements.

Treatment Process: Volvic Natural Spring Water is treated with Greensand Filtration – the use of manganese coated filters to reduce naturally present minerals from source water.

FDA’s website for recalls: <http://www.fda.gov/opacom/7alerts.html>

Our product has been thoroughly tested in accordance with federal and California law. Our bottled water is a food product and cannot be sold unless it meets the standards established by the U.S. Food and Drug Administration and the California Department of Public Health. The following statements are required under California law:

“Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the United States Food and Drug Administration, Food and Cosmetic Hotline (1-888-723-3366).”

“Some persons may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons, including, but not limited to, persons with cancer who are

Volvic Natural Spring Water California Bottled Water Report

undergoing chemotherapy, persons who have undergone organ transplants, persons with HIV/AIDS or other immune system disorders, some elderly persons, and infants can be particularly at risk from infections. These persons should seek advice about drinking water from their health care providers. The United States Environmental Protection Agency and the Centers for Disease Control and Prevention guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791)."

"The sources of bottled water include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water naturally travels over the surface of the land or through the ground, it can pick up naturally occurring substances as well as substances that are present due to animal and human activity. Substances that may be present in the source water include any of the following:

- 1. Inorganic substances, including, but not limited to, salts and metals, that can be naturally occurring or result from farming, urban storm water runoff, industrial or domestic wastewater discharges, or oil and gas production.*
- 2. Pesticides and herbicides that may come from a variety of sources, including, but not limited to, agriculture, urban storm water runoff, and residential uses.*
- 3. Organic substances that are byproducts of industrial processes and petroleum production and can also come from gas stations, urban storm water runoff, agricultural application, and septic systems.*
- 4. Microbial organisms that may come from wildlife, agricultural livestock operations, sewage treatment plants, and septic systems.*
- 5. Substances with radioactive properties that can be naturally occurring or be the result of oil and gas production and mining activities."*

"In order to ensure that bottled water is safe to drink, the United States Food and Drug Administration and the State Department of Public Health prescribe regulations that limit the amount of certain contaminants in water provided by bottled water companies."

NSF Reference	Parameter / Test Description
C1188	Odor, Threshold Number (Ref. Standard Methods 2150 B)
C2015	2,3,7,8-TCDD (Ref: EPA 1613B)
C3012	* Asbestos in Water (Ref: EPA 600/4-83/043,100.1)-Bureau Veritas
C3013	Chloride (Ref: EPA 300.0)
C3014	Bromide (Ref: EPA 300.1)
C3015	Bromate (Ref: EPA 300.1)
C3016	Nitrogen, Nitrate (Ref: EPA 300.0)
C3017	Nitrogen, Nitrite (Ref: EPA 300.0)
C3018	Sulfate as SO4 (Ref: EPA 300.0)
C3019	Cyanide, Total (Ref: EPA 335.4)
C3021	* Phenolics, Total Recoverable (Based on EPA 420.2)
C3025	Chlorite (Ref: EPA 300.1)
C3033	Aluminum (Ref: EPA 200.8)
C3036	Arsenic in Drinking Water by ICPMS (Ref: EPA 200.8)
C3039	Barium in Drinking Water by ICPMS (Ref: EPA 200.8)
C3042	Beryllium in Drinking Water by ICPMS (Ref: EPA 200.8)
C3044	Calcium in Drinking Water by ICPAES (Ref: EPA 200.7)
C3047	Cadmium in Drinking Water by ICPMS (Ref: EPA 200.8)
C3053	Chromium in Drinking Water by ICPMS (Ref: EPA 200.8)
C3059	Copper in Drinking Water by ICPMS (Ref: EPA 200.8)
C3064	Iron in Drinking Water by ICPAES (Ref: EPA 200.7)
C3072	Mercury in Drinking Water by ICPMS (Ref: EPA 200.8)
C3079	Potassium by ICPAES (Ref: EPA 200.7)
C3085	Magnesium in Drinking Water by ICPAES (Ref: EPA 200.7)
C3086	Manganese in Drinking Water by ICPMS (Ref: EPA 200.8)
C3091	Sodium in Drinking Water by ICPAES (Ref: EPA 200.7)
C3094	Nickel in Drinking Water by ICPMS (Ref: EPA 200.8)
C3101	Lead in Drinking Water by ICPMS (Ref: EPA 200.8)
C3114	Antimony in Drinking Water by ICPMS (Ref: EPA 200.8)
C3116	Selenium in Drinking Water by ICPMS (Ref: EPA 200.8)
C3128	Thallium in Drinking Water by ICPMS (Ref: EPA 200.8)
C3136	Zinc in Drinking Water by ICPMS (Ref: EPA 200.8)
C3144	Solids, Total Dissolved (Ref: SM 2540-C)
C3145	Turbidity (Ref: EPA 180.1)
C3155	Surfactants, Methylene Blue Active Substances (Ref: SM 5540-C)
C3157	Color (Ref: SM 2120-B)
C3158	Specific Conductance (Ref: EPA 120.1)
C3159	pH (Ref: SM4500-HB)
C3161	Hardness, Total (Ref: EPA 200.7)
C3166	Bicarbonate (Ref: SM 2320-B)
C3168	Chlorine Dioxide (Ref: SM 4500-CIO2-D)
C3169	Chloramines (Ref: SM 4500-CI-G)
C3170	Fluoride (Ref: SM 4500-F-C)

Test descriptions preceded by an asterisk "*" indicate that testing has been performed per NSF International requirements but is not within its scope of accreditation.

The reported result for Odor, Phenolics, Potassium, Specific Conductance, Radon and Total Residual Chlorine cannot be used for compliance purposes within the State of Arizona.

Notes:

- 1) Bottled water sold in the United States shall not contain Fluoride in excess of the levels published by the USFDA in 21 CFR Part 165.110. These levels are based on the annual average of maximum daily air temperatures at the location where the bottled water is sold at retail. Please refer to the most current edition of the regulation to determine the Fluoride maximum level that pertains to your product.
- 2) A blank on the FDA SOQ column indicates that no maximum level has been established by the FDA for that contaminant.
- 3) An ND result means that the contaminant was not detected at or above the reporting limit.
- 4) Product not evaluated for Total Dissolved Solids against the minimum FDA SOQ for the labeling of the product as Natural Mineral Water. Company is responsible for compliance with applicable regulatory requirements applicable to conducting commerce.

For a list of NSF International Method Detection Limits refer to http://www.nsf.org/media/eneews/documents/minimum_detection_level_spreadsheet.pdf.
